OUR
CORE INDUSTRIES

WE SOLVE COMPLEX CHALLENGES

Adding Robotics specializes in providing strategic consulting and offering experienced manpower for all industries.
We assist both private and public organizations in need of guidance to address complex challenges related to productivity, workflow, work environment, quality, stability, and flexibility.

COMPETENCIES
& CAPACITY
GET ADVICE ON MOVING FORWARD

ROBOTICS & AUTOMATION
STRATEGIC CONSULTING

Adding Robotics provides strategic automation consulting to private and public organizations in need of solving complex production and logistics challenges. We assist with business case calculations, concept and development phases, as well as FAT & SAT procedures.

We can handle project management for technical equipment investments, and we offer guidance or carry out requirement specifications, tender documents, bid evaluations, as well as selection of the right technology suppliers.

AI & MACHINE LEARNING
LEARNING

Adding Robotics provides active guidance that helps clarify the value of integrating AI and ML into specific processes, procedures, and products.

As machines and robots increasingly mimic human thinking and behavior, AI and Machine Learning (ML) hold potential for more and more companies, industries, and organizations.

We advise on how AI/ML can be implemented in predictive maintenance, process optimization, wear reduction, and quality control, among other areas.

PROCESS ANALYSES
IMPROVED RESOURCE UTILIZATION

Adding Robotics has many years of experience helping private and public organizations identify bottlenecks and highlight inefficient procedures.

Our analyses pave the way for productivity gains, smoother processes, and more functional flows. We ensure better resource utilization, turning waste into gains.

MANPOWER
EXTERNAL CAPACITY

Adding Robotics provides capacity to companies and organizations that, for shorter or longer periods, wish to incorporate flexible workforce and expertise to swiftly and effectively complete projects.

We are accustomed to working in various industries, and our expertise ensures thorough planning, a solid start, and successful project completions.

Most often, we seamlessly integrate into the client's organization, always performing competently, loyally, and with the client's interests in mind.

ABOUT
ADDING ROBOTICS

NATIONWIDE & 100% INDEPENDENT

Adding Robotics is a sister company of Adding Engineering.

We are a team of experienced experts with extensive know-how.

We have profound knowledge of the right solutions that elevate, simplify, and strengthen.

Based on our three offices, we provide competent and 100% independent strategic consulting as well as manpower to private and public organizations in Denmark and abroad.
